
Adam Abdelnaby **Mechatronics Engineer**

Professional Summary

Mechatronics Engineering graduate with a strong foundation in mechanical design, control systems, and structural analysis. Grew up engaging with diverse communities, which shaped the ability to adapt quickly and communicate across cultures. Gained experience in customer-facing sales and technical involvement in the automobile service industry.

Now I am looking to apply these skills in the evolving world of future in all areas of industry, automotive and robotics technologies, especially in design, control integration, or technical project engineering.

Contact Information:

- **+90 536 023 24 90 | eng-a20@outlook.com | Istanbul, Turkey**

Education:

- B.Sc. in Mechatronics Engineering, IŞIK University, Turkey. 2025.

Core Skills:

- Mechanical Design (CAD/CAM).
- Technical Analysis, Negotiation, and Project Management & Procurement.
- Technical Reporting & Team Coordination

Computer Skills:

- Artificial Intelligence (AI) Implementation.
- SolidWorks.
- ANSYS Workbench.
- MATLAB.
- Microsoft Office Suite.

Languages:

- Arabic: Native. (Egypt)
- English: Professional.
- Turkish: Professional.

Detailed Professional Experience

Graduation Project | Project Engineer | IŞIK University | Spring 2025

Design of an Automatic Loading System for 120 mm Tank Ammunition

- Designed gripper self-locking mechanism system for 28 kg tank rounds
- Performed static, vibration, and shock analysis under MIL-STD-810H using ANSYS
- Completed full documentation, material selection (Pugh Matrix), and cost analysis

Intern - Service Department | Chevrolet Service Centre, Cairo | Jun 2023 – Sep 2023 / 2024

- Eliminated outsourcing need, increasing service efficiency and cost savings (~75%)
- Performed diagnostics using OBD-II and GM software to code/reprogram SRS-Air bag and PSCM module.
- Performed engine & gearbox teardown, troubleshooting, and system rebuild.

Intern - Manufacturing | Altunel Makina, Istanbul | Jun 2022 - Aug 2022.

- Created CNC code from SolidWorks CAD for mold manufacturing projects.
- Gained end-to-end understanding of production workflow and tolerance inspection.
- Improved precision in CAD-CAM transitions through dimensional testing.

Quality Assurance Trainee | Orient Orbits Company, Kuwait State | Sep 2017 - Oct 2017

- Organized and refined data collected from sites using GPS and Total Station equipment.
- Coordinated data transfer to MS-Excel data sheets.
- Analyzed data to ensure accuracy and completeness.

Additional Experience:

International Business Relations

- Leveraged a robust professional network across Egypt, Turkey, and the GCC to facilitate cross-border business partnerships.
- Facilitated B2B introductions and trade relations between Turkish manufacturers and stakeholders in the Egyptian and Gulf markets.
